

# Freezer

presented by  
Seibu Giken DST AB  
"The Dry Air Specialists"

# Problems with moisture

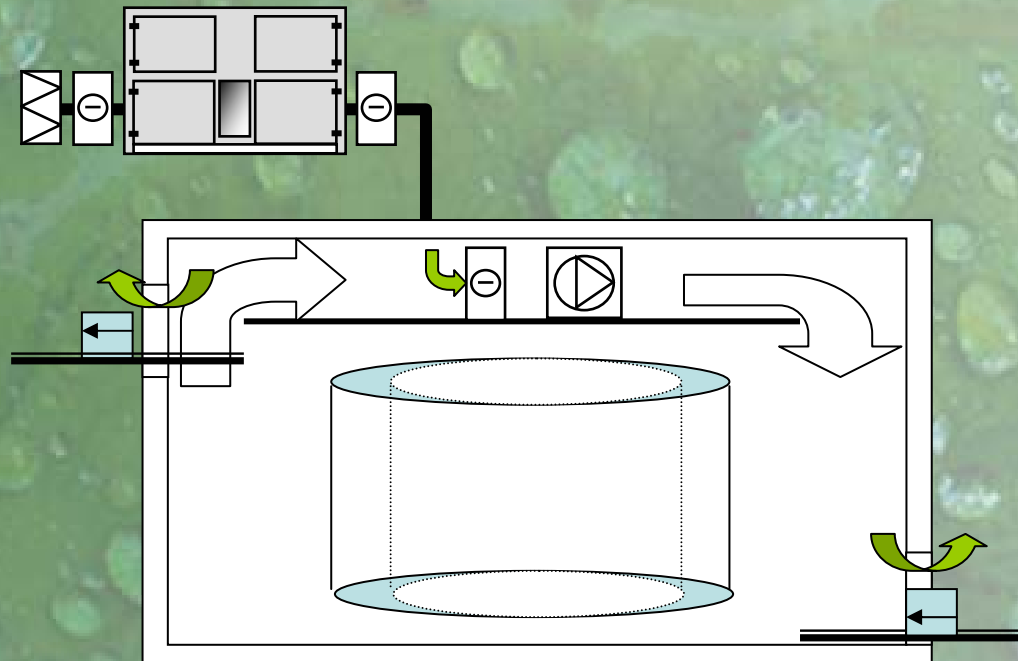

- Frost build up on evaporators
- Short periods between stops for defrosting
- Conveyors can lock up by ice
- Increasing temperature due to ice built up
- Snow or frost on the products

# Benefits with dehumidification, packed products

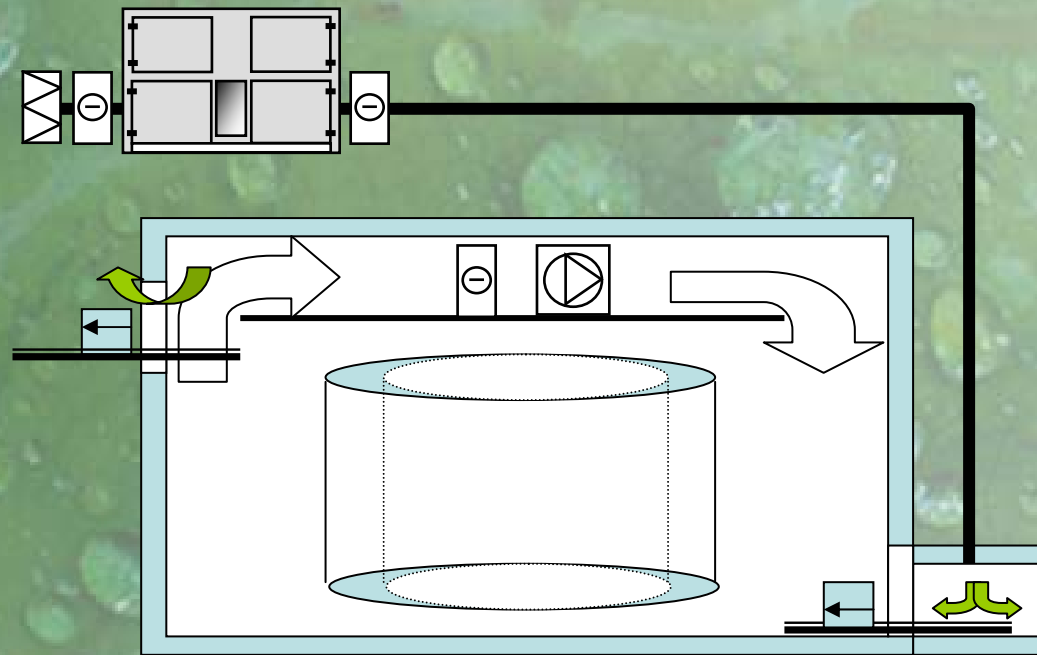

- No ice or frost on products
- Increased production time, less stand still for defrosting
- Constant temperature in the freezer
- Higher hygiene during stand still

# Solution with overpressure

# Freezer alternative solution with dry air to the airlocks
