situated in Fukuoka,
Japan

Seibu Giken DST AB

- **DST was founded in 1985**

by Mr Gunnar Ankarstig in corporation with Mr Uno Jonsson, who both had been working in the dehumidification business for about 15 years. They started with nothing but a rotor; no market , no units.

Today, Mr Anders Kristoferson is the managing director of Seibu Giken DST (photo to the right)

- DST now have representatives all over the world and a wide range of dehumidifiers.

Seibu Giken DST AB

- The amount of delivered dehumidifiers reaches over 27 000 units.

DST have representatives in nearly 40 countries over the world.

The business idea of Seibu Giken DST

“ We shall satisfy the customers need
to protect material against damages
caused by humidity”

Example of dehumidifiers from Seibu Giken DST AB:

DR-010B, DR-020, DR-030C, DR-40
Dehumidifiers in stainless steel. Suitable for applications such as water damage restoration, pump stations and dry air storages.

CF-152 of the Flexisorb series Industrial sized dehumidifier. This unit was delivered to Saudi Arabia.

The SSCR rotor- the heart in the dehumidifying process.

The SSCR rotor from Seibu Giken is the heart in the dehumidification process. With the silica gel chemically bound to the carrying material, a long lifetime is guaranteed.

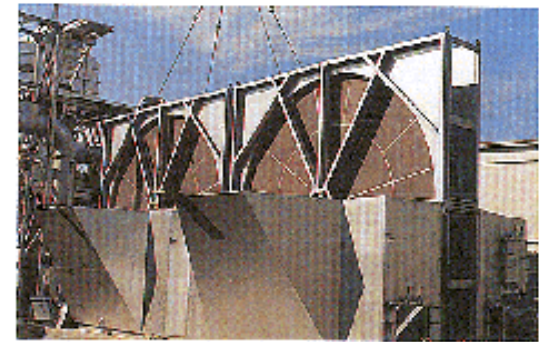

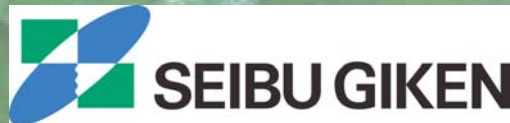

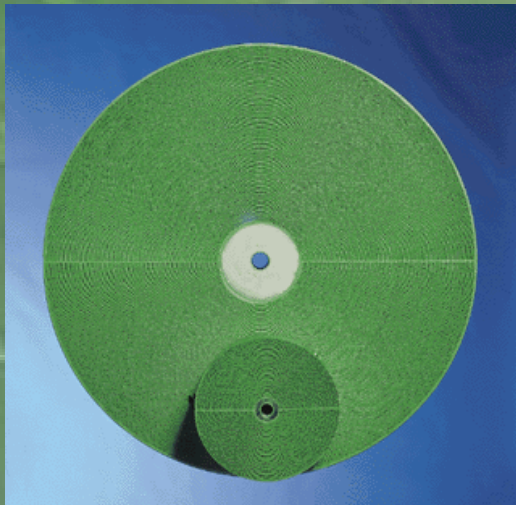

Advantages with the SSCR-rotor:

- The silica gel rotors have a high adsorption capacity
- Long lifetime, most of the first delivered rotors are still in operation today.
- Tests shows that no particles carries over to the dry air
 - There are no bacterial growth on the SSCR rotor
 - The rotor is washable

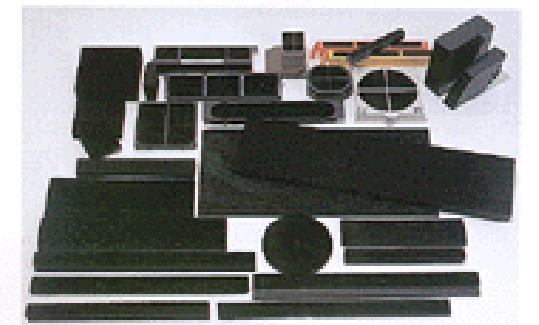

Products from the Seibu Giken Co, Japan

Products from Seibu Giken:

- Rotors
- VOC concentrators
- the “HI-PANEX” series-Total/Sensible Heat Exchangers
- Deodorizing, ozone decomposing elements

VOC concentrator

Deodorizing, ozone decomposing elements
